Lecture schedule

HOME

The Emergency Medicine Residency Program is introducing an **Evidence Based Emergency Medicine** curriculum this academic year.

It will consist of 1 session per month to be held during the Thursday conference day.

The expectations of the residents during this session will vary by postgraduate year. They will become progressively more comprehensive as you progress through the program.

Each year will have a Record of Achievement to complete.

PGY 1 will be expected to formulate a question based on a clinical encounter and be able to design a search strategy.

PGY 2 will be expected to critically appraise an article for Journal Club.

PGY3 will be expected to put the whole process together and formulate a critically appraised topic.
